Education

- **Pandit Ravi Shankar Shukl Univercity Raipur** Aug 2024 – Jul 2026
Master of Computer Applications (MCA) **CPI: 6.81**
- **Govt. Nagarjuna P.G. College of Science, Raipur** Jun 2021 – Apr 2024
Bachelor of Computer Applications (BCA) **CGPA: 7.43**

Profile Summary

•Full Stack Web Developer

- Full Stack Web Developer with hands-on expertise in the **MERN Stack (MongoDB, Express.js, React.js, Node.js)**, delivering scalable and maintainable end-to-end web applications.
- Experienced in developing responsive user interfaces and robust **RESTful APIs**, ensuring efficient client-server communication and database operations.
- Strong focus on writing clean, optimized code, solving real-world problems, and continuously enhancing skills to align with modern web development best practices.

Projects

- **airbnb-clon | GitHub** May 2025
NodeJS, MongoDB, ejs, ExpressJS, Tailwind CSS
 - A simple Airbnb-style web app for hosts and users to create, list, view, update, and manage property listings with user accounts and role-based access (user/admin).
 - User authentication, listing submission/editing, image uploads, listing detail and list views, and admin/host pages (routes and controllers handle listing, submit, update, login, and about).
 - Node.js + Express server with EJS views, MongoDB via Mongoose for data, multer (local uploads) and session-based auth **100% test coverage**.
- **TalkEasy-VoiceAssistant | GitHub** Feb 2025
Python, NodeJS, CSS, googel-gemini, murfAI, AssemblyAI
 - Real-time voice assistant that streams microphone audio to a **FastAPI** backend, transcribes with **AssemblyAI**, generates responses via an **LLM**, and returns spoken replies using Murf AI TTS for live conversational interactions
 - Modular FastAPI server (main.py) with service classes in **services (STT, LLM, TTS, DB)**, plus a JavaScript frontend (app.js) handling **WebSocket** audio streaming and playback with the contact form to capture 95% of website leads, reducing manual effort by 10 hours per week.
 - JWT-based auth, consistent Pydantic schemas (models), **SMTP**, and clear service-initialization patterns for easy integration and testing.
- **streamify-chat app | GitHub** Feb 2025
React, Tailwind CSS, Vite, NodeJS, ExpressJS, MongoDB
 - A full-stack real-time video-call and chat application that combines peer-to-peer audio/video streaming with persistent chat and social features.
 - Monorepo split into backend (Node/Express, controllers, models, routes, email/stream libs) and frontend (React components, hooks, lib/api, Tailwind + Vite), wired for WebRTC-style streaming and REST/real-time messaging

Skills

Programming Languages: Java, JavaScript, TypeScript, C, C++
Frameworks/Libraries: React, Node.js, Express.js, Tailwind CSS
Database: MySQL, NoSQL
Tools: Git, Postman, GitHub Actions,
Soft Skills: Leadership, Team Collaboration, Communication

Interests

- Web Development and Scalable Application Design, with a focus on building secure, high-performance, and maintainable full-stack applications.
- Continuous Learning of Emerging Technologies, frameworks, and tools to stay updated with modern web development trends and industry best practices.
- UI Design and User-Centered Interface Development, emphasizing accessibility, usability, responsive layouts, and seamless user experience.
